

## Your Letterhead

Date \_\_\_\_\_

Dear Parent or Guardian:

Vaccinations are important in the prevention of infectious disease and may save your child's life during an outbreak.

Your child \_\_\_\_\_ has not met the minimum immunization requirements for school entry. Children attending school in Idaho must have a minimum of 4-5 doses of Diphtheria, Tetanus, & Pertussis (DTaP), 3 doses of Polio (IPV), 2 doses of Measles Mumps Rubella (MMR) and for children born after November 22, 1991, 3 doses of Hepatitis B (IC 39-4801).

Your child needs the following immunizations:

- ☐ DTaP      Dose Number: 1 2 3 4 5
- ☐ Polio      Dose Number: 1 2 3
- ☐ MMR      Dose Number: 1 2
- ☐ Hepatitis B Dose Number: 1 2 3

According to state law, we cannot allow your child to attend school unless we receive evidence that the above requirements are met by this date: \_\_\_\_\_.

For children requiring more than one dose of any one vaccine; the series must be started by the above date and a Schedule of Intended Immunizations form must be completed. The child will be admitted on the condition that they will receive still-needed doses as they become due.

Failure to receive the above vaccinations before the deadline will result in your child being excluded from school in accordance with IDAPA 16.02.15, section 102.03.

Once your child has received the above immunizations, a copy of the child's immunization record must be provided to the appropriate school official so that school records can be updated.

Thank you for your cooperation;

School Administrator
